

UI Web project Test Plan:

UI web project is to test web UI pages and make sure web pages work as expected on Chrome browser

Functional test:

- Test the web UI flow and all the UI pages to make sure all web pages work as expected on Chrome browser

Regression test:

- Not required

Performance test: (Not complete)

- Provide output performance metrics
 - Plan to use pytest-performance, not implement yet

Test Use Cases:

UI web test

- Test web UI flow (happy flow), validate web UI flow completes with required inputs
- Test Zip Code page, validate required input
- Test Type of Real Estate page, validate required input
- Test Search Home Value page, validate all required inputs

Issues:

- Sometimes Search Home Value page is not returned

Note:

- UI Web test is only tested on Chrome browser on MacBook
- No other device test is covered
